Quassel IRC - Bug #1062

n900/maemo: deadlock when application menu and password dialog interfere

03/12/2011 12:10 AM - sgiessl

Status:	Resolved		**Start date:**	03/12/2011
Priority:	High		**Due date:**	
Assignee:	sgiessl		**% Done:**	0%
Category:	Quassel2Go		**Estimated time:**	0.00 hour
Target version:	0.8.0			
Version:	0.7-pre		**OS:**	Any

Description

Steps to reproduce:
- Disable saving passwords
- Connect
- Click to open application menu (just before quassel2go asks for the password)

Result:
- Password dialog opens while application menu is open
- Windows can not be closed
- Device shortcuts do not work. Device needs reboot

History

#1 - 04/03/2011 12:14 AM - sgiessl

- Status changed from Assigned to Resolved

resolved n900/hildon application menu hang/deadlock
by making password dialog asynchronous
(instead of the synchronous password request within a slot)
