

Quassel IRC - Bug #1076

Not marked /back when reattaching to core

05/09/2011 12:40 AM - Desoxy

Status:	New	Start date:	05/09/2011

Target version:		OS:	Linux
Version:	0.7-pre		
Description I have the "Away On Detach"-Option enabled in my client, and am successfully marked as "Away" once I detach. But when I reattach to the core again, I am not marked as online, but rather have to issue /back for each network by hand. For normal IRC networks it does not bother me as much but in combination with BitlBee I forget to type /back far too often.. Client: Version: v0.7.1 (dist-aa28596) Protocol version: 10 Built: Sep 21 2010 13:42:35 (Windows 7-64 bit) Core: Version: 0.7.1-1+b1 (Debian testing repositories)
