

## Quassel IRC - Bug #1090

### changeBuffer() fails if trying to skip over a group with no children

<b>Description</b>			
<p>This can be seen by, for example, using the shortcut for "next buffer" when currently in the last buffer of a group, when the next group is empty but there are nonetheless later buffers open. Or diagrammatically:</p> <ul style="list-style-type: none"><li>• Quakenet<ul style="list-style-type: none"><li>◦ #channel</li><li>◦ #currentchannel</li></ul></li><li>• FreeNode</li><li>• OFTC<ul style="list-style-type: none"><li>◦ #iwanttogohere</li></ul></li></ul> <p>Shouldn't be too hard to fix. I can envisage having a method to get the next/previous buffer being useful.</p>
