Description

Just an idea. I'm connected to 6 networks, and use "/anick Atry|away" to signal that I'm away (whether you like it or not). I've seen it done by both a specific /anick command, or the addition of the /add command, so an alias could be added "/all nick $0" or some such as "/anick".

Er, shit, made this a bug instead of a feature. Should I redo it?
