Quassel IRC - Bug #1148

parse timestamps in +Iebq list

03/26/2012 11:39 AM - gry

Status:	New		**Start date:**	03/26/2012
Priority:	Normal		**Due date:**	
Assignee:	gry		**% Done:**	0%
Category:			**Estimated time:**	0.00 hour
Target version:	Some future release			
Version:	0.7.3		**OS:**	Any

Description
For +Iebq entries, Quassel currently displays raw lines in-channel * 367 #channel ban_mask_here irc.example.net 1331388332 It could be useful to at least display a human readable date/time the entry was set.

- File 0001-parse-Iebq-no-message-redirection-yet.patch added

In this patch, handled as Message::Server, the +Iebq lists get sent to Status Buffer.

Some people get many snotes and set 'server notices' target to status buffer. For such users, +Iebq lists could only go to status buffer (but for some of them, it would be more comfortable to see them in-channel instead!). There must be a separate option to handle such preference; that's why this patch isn't final and is simply attached here rather than a merge request.

What I personally would expect to see/do is a new option for 'server messages target', or a way to send the output to channel. I'm leaving this comment here for a proper discussion to find a good way to resolve this problem.

#5 - 04/27/2012 03:37 AM - gry

It can be simpler to just output ban lists to the channel. MR https://gitorious.org/quassel/quassel/merge_requests/141
