Quassel IRC - Feature #1149

Add multiprotocol instant messenger functionality to core and clients

03/26/2012 12:52 PM - anystupidassname

OS:	Any		

Description

I realize how huge a task this is but I think you could just integrate libpurple/pidgin/finch into the core and nothing / not much would need to change on the clients. I noticed several other quassel feature requests talking about "buddy pounce" and other features already in pidgin too.
