OS:	Any			

Description

iOS has anywhere between 20%~50%, depending on who and how you ask, of the market in mobile devices. A iOS native client app would benefit users that have such devices, i.e. iPhone, iPad, iPod Touch.

Request: Native Quassel client for iOS.

History

I've started with a client for the iPad (no iPhone).
It's still quite basic, but improvements will come over time.
