Revision ffca9a2e - 02/01/2013 04:34 PM - Bas Pape

Use QCoreApplication::arguments() for genversion

This prevents issues with locales and unicode paths.

For simple assignments QString uses fromAscii, which breaks this case. However, i failed to get it to work with either of fromUtf8, fromLocal8Bit (which should use the local locale, which would be preferred, i guess). Note that the same goes for non-ascii git dirs.
