

Quassel IRC - Bug #1225

Authserv rejects passwords sent by Quassel

05/23/2013 09:52 AM - bkloster

Status:	Closed	Start date:	05/23/2013
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Quassel Core	Estimated time:	0.00 hour
Target version:		OS:	Any
Version:	0.9-pre		
Description			
<p>After registering an account at gamesurge.net, I tried logging in by entering "/authserv auth [user] [pass]" into Quassel while connected to the gamesurge network. Authserv rejected the password as incorrect. Using gamesurge's web client (https://gamesurge.net/chat/), the same password is accepted.</p> <p>The same issue happened with authserv's cookies. Although copied & pasted from the email, authserv didn't recognize the cookie. The web client did.</p> <p>I was able to reproduce this in Quassel v0.9.0 (dist-3b9dd10), on both Windows 7 and Ubuntu 13.04 (both 64 bit).</p>

- Status changed from New to Feedback

Probably related to the superfluous colon on what quassel thinks is the last param; can you try `/quote authserv <user> <pass>` instead and report back?

#2 - 05/23/2013 05:31 PM - bkloster

That did it, thank you!

For anyone googling this: The complete correct command is

```
/quote authserv auth <user> <pass>
```
