Quassel IRC - Feature #1252

separate log and backlog tables

11/09/2013 12:09 AM - gry

Status:	New		**Start date:**	11/09/2013

Target version:				
OS:	Any			

Description

Currently only backlog table exists.

Having a separate log table would leave more freedom in having an entry logged, but not displayed in the channel/users tree.

Once a channel or query is "closed", its backlog is deleted while it is only retained in logs.
Once a channel or query is activated, its logs are moved to backlog.

(There are hundreds of entries which are only activated few times a year, or just once at all, and keeping them in backlog is useless.)

History

#1 - 11/09/2013 09:39 PM - gry

This may also be designed as additional 'log_archive' table. Users select option to archive all buffers with no activity during last X weeks, and they disappear from backlog, but re-appear if the relevant channels are re-activated.

#2 - 12/23/2013 08:25 PM - Anonymous

- *Tracker changed from Bug to Feature*

- *Category set to Quassel Core*

Most likely to be rejected, but won't make that call now.
