Description			
<p>Hi,</p> <p>I'm the dev of https://github.com/phhusson/QuasselBots/ (bots in C/lua connecting to a quasselcore), and to extend its capabilities (or of similar projects), having a 'bot' flag on connection would be great.</p> <p>Possible uses I see are:</p> <ul style="list-style-type: none">-for the clients connected counter: the automatic go to away no longer work with a connected bot. <p>This would enable events on away monitoring the networks away flag.</p> <p>(Linked to http://bugs.quassel-irc.org/issues/728)</p> <ul style="list-style-type: none">-Have a /internal command that sends commands to connected bots (with the ability to add a message to a buffer without actually sending it to the IRC server, that would be perfect !) <p>(Linked to http://bugs.quassel-irc.org/issues/1107)</p> <p>But there may be other possible uses</p> <p>Thanks</p>			

History

Having a way to send a message to a buffer without sending to IRC server would also help <http://bugs.quassel-irc.org/issues/1282>
