

Quassel IRC - Bug #133

Split long lines

04/05/2008 09:54 PM - xAFFE

<b>Status:</b>	Resolved	<b>Start date:</b>	
<b>Priority:</b>	High	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	0%
<b>Category:</b>	Quassel Core	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>		<b>OS:</b>	Any
<b>Version:</b>	0.13.1		
<b>Description</b> If you write Messages with more than 512 Bytes (Actualy its from 480 to 500 chars, deppending how long the channelname is), quassel sends them atm directly to the server and the message gets cut off after the 512 Bytes.  Quassel should split the long message into several small messages so the whole content is deliverd.			
<b>Related issues:</b> Is duplicate of Quassel IRC - Bug #39: Handle messages longer than 512 bytes <b>Resolved</b>
