Missing / Not correctly implemented Commands

Status:	Resolved	Start date:	
Priority:	High	Due date:

Target version:	0.2.0-beta1	OS:	Any

Description /ban Somehow, /ban is not translated correctly to /mode +b. As an extra bonus feature, providing a sensible hostmask for /ban <nick> would be great. Such as !ident@.sld.tld... /oper /kill Steps to reproduce: Enter: /ban !*sdvgsdgf* Get: [23:56:17] * +b !*sdvgsdgf** No such channel #karlsruhe			

History

#1 - 04/14/2008 04:47 PM - phon

/ban in a channel or /ban #channel requests the banlist
/ban [#channel] nick bans the hostmask of the nick (with some wildcards)

anything else will be directly forwarded to the server (as long as there is channel specified)
