

Quassel IRC - Bug #1357

Shortcut Configuration: Default settings gone

05/15/2015 08:34 PM - public

Status:	New	Start date:	05/15/2015
Priority:	Normal	Due date:	
Assignee:		% Done:	0%

Target version:		OS:	Linux
Version:	0.11-pre		
Description			
<p>After the last update of Quassel Client (I'm using v.0.12.2 (dist-9c5e6c6), now), I've lost my default shortcut settings. This is especially annoying, as it is not possible to restore at least one of the default mappings by custom mappings: The dialog does not accept the Tab key as a mapping parameter, which renders the "tab completion" feature virtually.</p>
