

Quassel IRC - Bug #1380

Core should encrypt the storage

08/29/2015 02:00 PM - gry

<b>Status:</b>	New	<b>Start date:</b>	08/29/2015
<b>Priority:</b>	Normal	<b>Due date:</b>

<b>Target version:</b>		<b>OS:</b>	Any
<b>Version:</b>	0.10.0		
<b>Description</b>			
Users may be concerned that their logs are stored without encryption. While it could be possible to encrypt the whole partition for this, Quassel probably also should encrypt the storage of each user using a user-supplied password, so that having access to the storage or to the password of one user does not immediately mean having access to the storage of other users on the same core.
