

Quassel IRC - Bug #142

Deleting a buffer-view in the "Manage Views" Menu deletes all buffers but the one selected to be deleted.

Target version:	0.2.0-beta1	OS:	Any
Version:	0.13.1		
Description When deleting a buffer in the "Manage Views"-Menu, the wrong buffer gets deleted. I added a new buffer, but after deleting it, the standart "All Buffers"-buffer and another one i created earlier ware deleted and the buffer i recently added still remained. Seems like the buffer you want to delete is the only buffer that not gets deleted. Additional information: OSX Client Build 731 Linux Static Core Build 733

Luckily only a display issue... Reconnecting to the core fixes it at the time beeing.

Will be fixed in one of the next few commits
