Quassel IRC - Bug #1442

Automatically reconnect after suspend/connectivity reconnection

08/06/2017 04:11 PM - alexandernst

Status:	Resolved	**Start date:**	08/06/2017
Priority:	Normal	**Due date:**

Category:	Quassel Client	**Estimated time:**	0.00 hour
Target version:			
Version:	0.12.4	**OS:**	Any

Description
I don't know if this happens only in Mac or if it applies to all OSes, but I noticed that whenever my Mac goes in sleep mode, or if I suspend it, or if there are some network connectivity issues, the client disconnects and then never connects backs. I have to manually connect to the core (File -> Connect to core).

Can Quassel reconnect automatically when connectivity is available? |

History

#1 - 01/31/2018 07:51 PM - romibi

probably the same issue as this ...
https://github.com/quassel/quassel/pull/319
we need to provide the bearer plugin with quassel ...

not completely sure how to do it ... (the mac build script is a mess)
but i'll see if i find time to do it...

One Workaround is to set "Network Status Detection" to "Ping Timeout" instead of "Automatic" ...
