

Quassel IRC - Feature #146

Networks in custom view only alphabet-sortable

04/14/2008 09:05 PM - ralf

|                                                                                                                                           |                |                        |           |
|-------------------------------------------------------------------------------------------------------------------------------------------|----------------|------------------------|-----------|
| <b>Status:</b>                                                                                                                            | New            | <b>Start date:</b>     |           |
| <b>Priority:</b>                                                                                                                          | High           | <b>Due date:</b>       |           |
| <b>Assignee:</b>                                                                                                                          | EgS            | <b>% Done:</b>         | 0%        |
| <b>Category:</b>                                                                                                                          | Quassel Client | <b>Estimated time:</b> | 0.00 hour |
| <b>Target version:</b>                                                                                                                    |                |                        |           |
| <b>OS:</b>                                                                                                                                | Any            |                        |           |
| <b>Description</b>                                                                                                                        |                |                        |           |
| Only tested in Mac version:                                                                                                               |                |                        |           |
| The networks cannot be moved around in a custom view, unlike the channels/queries.                                                        |                |                        |           |
| It is desirable that the networks can also be put in any order the user likes, and that they are not restricted to alphabetical ordering. |                |                        |           |
