

Quassel IRC - Bug #1505

Client configuration is world readable and contains password in plain text

12/11/2018 05:06 PM - kitterma

Status:	Resolved	Start date:	12/11/2018

Version:	0.13.0		
Description			
https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=806500			
As I was trying to setup CertFP I had a look at ~/.config/quassel-irc.org and noticed the following: <pre>rw-r--r-- 1 diderik diderik 8101 nov 28 03:01 quasselclient.conf</pre>			
Looking into that file I could easily see my password and that combined with the security settings of that file did not make me happy.

Hi there.

I have just tested this on both Fedora 34, built from the latest source code on Github, and on Debian 10 using the packaged Quassel Client, and both are placing ~/.config/quassel-irc.org/quasselclient.conf with permissions of 0600.

I believe that it is safe to close this bug. Thanks for the report.
