

Quassel IRC - Bug #1524

All Chats window cannot be docked back on Windows

05/05/2019 11:31 PM - Manneveru

Status:	Feedback	Start date:	05/05/2019
Priority:	High	Due date:

Target version:		OS:	Windows
Version:	0.13.0		
Description I accidentally undocked All Chats window into floating and I can't dock it back on Windows. Nicks windows works fine, both double click on title bar and moving until the box appears in main window to drop. That's quite annoying. The problem is present in 0.13.1 on Windows 10.

I just tried this with 0.13.1 on Win10 and can successfully re-dock the chatlists (incl. All Chats). Double click or dragging the title bar to un-dock and a double click re-docks where it was, dragging required hitting the lower left corner (assuming it was docked on the left). I was also able to dock on the right side and then move it back to the left.

Can you confirm that your issue persists after a client restart?

I am seeing similar behaviour. RPM-based install of Fedora 33. I am unable to re-dock. Double-clicking or dragging either simply moves the undocked content, or makes it full screen.

Obviously possible I am missing the point - but it's not apparent (*to me) how to re-dock.

I'm having the issue on Nobara 41 KDE (which is Fedora 41 based), which uses Wayland, and I wouldn't be surprised if that's part of the issue. Double clicking the undocked "panels" (windows) just maximizes them. Closing them, well, closes them.
