Quassel IRC - Bug #1548

quassel-core on Debian 10 cannot add users

01/15/2020 05:05 PM - fdik

Status:	Closed		**Start date:**	01/15/2020
Priority:	Normal		**Due date:**	
Assignee:	fdik		**% Done:**	0%
Category:	Quassel Core		**Estimated time:**	0.00 hour
Target version:	0.13.0			
Version:	0.13.0		**OS:**	Linux

Description

Doing the following steps on Debian 10.2:

```
# apt-get install quassel-core
```

Starting graphical Quassel client, connecting and adding admin user.

Then trying to add another user:

```
# su - quasselcore -s /bin/bash -c '/usr/bin/quasselcore --add-user --configdir=/var/lib/quassel'
```

This is failing with error:

```
[Error] Cannot open port for listening!
```

History

#1 - 01/15/2020 05:08 PM - fdik

This is a problem with apparmor on Debian.

Solution:

```
# apt-get install quassel-core
# aa-complain /usr/bin/quasselcore
# service apparmor restart
```

Starting graphical Quassel client, connecting and adding admin user.

Then adding a user with this is working:

```
su - quasselcore -s /bin/bash -c '/usr/bin/quasselcore --add-user --configdir=/var/lib/quassel'
```

#2 - 01/15/2020 05:19 PM - fdik

If you don't find aa-complain on your system install apparmor-utils

#3 - 06/20/2020 11:59 PM - digitalcircuit

- Status changed from New to Closed

This should be fixed with a newer Debian package as well:
https://salsa.debian.org/qt-kde-team/extras/quassel/-/commit/de4b3bc5fefa3e2928745f24acb18ca4b75599f6

Feel free to re-open the issue if it remains!
