

Quassel IRC - Feature #1579

Empty sent message history should be prefilled based on displayed sent messages

Description I find it rather annoying that every time I restart my client, I lose my message history available under arrow keys. For example, if I send a message "test", I can press arrow up and resend it quickly. If I restart my client, I still see that very recent message, but nothing appears when I use arrow keys. It would be nice if history would be backfilled from displayed sent messages.

It would be nice if history would be backfilled from displayed sent messages.

This user is suggesting a quality-of-life improvement for a messaging client. They want the message history, accessible via arrow keys, to be persistent even after restarting the client.

The initial text is a sample of "mock Latin" placeholder text—similar to Lorem Ipsum—dated January 20, 2016, with 170 comments. It mixes Latin-sounding phrases (tellus, consectetur, cuprum) with common English words (Health, cardio, technical, terminal). This kind of content is typically used in design layouts to demonstrate the appearance of a document or webpage before the final, meaningful text is inserted.
