Target version:	0.6.0			
OS:	Any			

Description

i would like to have one buffer per channel/query. sometimes im just writing something and want to leave it so and respond in another channel.
this is not possible atm, i have to delete everything and write it again in the end.
thanks!

History

#1 - 11/25/2008 05:05 PM - Alturiak

my thoughts on this:
- in addition to the history, the actual inputline should be channel-specific to, e.g. a filled inputline should clear upon switching channels and re-display the text when switching back
- above-mentioned feature should maybe be allowed to be switched on/off by the user, as irssi doesn't seem to clear the inputline upon switching channels

#2 - 12/04/2009 02:24 AM - juhp

- OS set to Any

I like quassel but I can't live in it without this feature.
(I don't know any other GUI irc client that doesn't do this.)

#3 - 02/25/2010 12:23 AM - nirik

Agreed. I am just playing around with Quessel and this is a feature that I would really like to see implemented as well.
