Quassel IRC - Bug #1723

High idle CPU usage

06/09/2021 01:54 PM - Vort

Status:	New		**Start date:**	06/09/2021
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:			**Estimated time:**	0.00 hour
Target version:				
Version:	0.13.0		**OS:**	Any

Description
While doing almost nothing, Quassel still uses 8-9% of CPU resources. Process Explorer threads information shows that this problem is somehow related to graphics processing: stack of problematic thread contains ig75icd64.dll!DrvValidateVersion function. Tested versions: quassel-x64-setup-0.13.1.7z, Windows.zip (nightly).

Problem should be solved, not hidden.

Another spammer? Or just dumb?
I will add this site to blocklist if admins do not fix spam problems.

#4 - 01/12/2022 11:14 AM - Vort

upd. Yes, no real people in this topic.

#5 - 01/12/2022 11:19 AM - Vort

If miracle happens and developers decides to fix bugs, then mail me directly.

Sorry, we haven't sorted out a good anti-spam option. It's been brought up in #quassel on Libera Chat, and I'm not sure what the most recent goal was.

Some of the community folks do look out for spam, but there isn't (yet) a proactive method, just reacting.

If there's a way to configure Redmine to hold comments in a moderation queue, that would probably help!
