Quassel IRC - Bug #18

Handle non-standard PREFIX in ISUPPORT (005)

11/12/2006 08:19 PM - Sputnick

Status:	Resolved		**Start date:**	
Priority:	High		**Due date:**	
Assignee:	EgS		**% Done:**	0%
Category:	Quassel Core		**Estimated time:**	0.00 hour
Target version:	0.2.0-rc1			
Version:	0.13.1		**OS:**	Any

Description
ETG (EnterTheGame.com) seems to send PREFIX=+ instead of PREFIX=(ov)+ as would be correct. This triggers an assert in handleServer005. We need to use sane defaults in these cases, I guess...

History

#1 - 12/21/2007 10:24 AM - Sputnick

We don't crash anymore on joining irc.enterthegame.com, but RPL_ISUPPORT still does not work correctly:

Received invalid RPL_ISUPPORT! Suffix is: "are available on this server" Excpected: are supported by this server

Should be further investigated.

#2 - 06/18/2008 04:41 PM - EgS

The last part of ISUPPORT should only contain the string "are supported by this server".
From know on we will only throw a warning if that string is not identical to the RFC.

Note: if there is additional ISUPPORT information in the last part, Quassel will ignore it. Faulty IRC Server implementation -> I don't care...
