

Quassel IRC - Feature #1825

Support importing an older profile's data

07/30/2022 10:56 PM - epk

Status:	New	Start date:	07/30/2022
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	General / Unspecified	Estimated time:	0.00 hour
Target version:			
OS:	Linux		
Description I had Quassel installed on a previous GNU/Linux distribution installation, and I have it installed on my current system. I would like to be able to import the data (mostly logs, and settings) from my old user directory's .config/quassel . I don't want to just overwrite the existing directory with the old one, since I've amassed new data.

Thanks for the info I will try to figure it out for more.
