Description Quassel (latest git; SHA 6623ba49cc1361179e95e8e3b976fd4c45298949 (I think xD)) fails to cmake with the following error using cmake 2.4.6-r1 or below: CMake Error: Error in cmake code at /home/strager/projects/quassel/CMakeLists.txt:93: ADD_DEPENDENCIES Adding dependency to non-existent target: mod_common Current CMake stack: /home/strager/projects/quassel/CMakeLists.txt;/usr/share/cmake/Modules/CMakeCInformation.cmake;/usr/share/cmake/Modules/CMakeCXXInformation.cmake cmake 2.4.7-r1 and above operate properly. Workaround (forcing users to upgrade) can be accomplished with a simple patch to /CMakeList.txt.
