**Description**

It' would be great to have a package whose making all thinks like :
init script
add to rc.d
Creating quassel user
installing dependencies sqlite if missing
add config file
add log directory
generate a log file.
start quassel-core

Please go to

https://bugs.launchpad.net/ubuntu/+source/quassel

and report every feature individually. Not sure where to go for Debian though. apachelogger does the packaging for *buntu, deepdiver for Debian.
