**Description**

!-Channels contain a unique ID by design (see <http://ircd.de/doc/channels.html>) this should not be shown in the Views (or better: configurable).

channel name should be !channelname rather than !XXXXXchannelname as in the current implementation.

This is also mentioned (but not further explained) in RFC 2812 (which requires an ID of the form [0-9A-Z]{5} on ! channels), so it's not just a matter of ircd implementation.
