Description			
http://libsigsegv.sourceforge.net/ was recommended by Flameeyes			
The documentation is a bit thin, but it seems to be worth a look, as it works with Linux, Mac OS X and Windows.			
Some things that come to my mind:			
- on Windows this Lib can only be build statically			
- on Linux one should use the lib from the repo			
- on Mac OS X we should ship the Lib with the bundle

Sput: please have a look at this thingy when you've got some spare time. **hehe**
This BR is mainly a reminder though ;)

Fixed for Linux, not needed on Mac, no solution in sight for Windows. Might want to revisit that one once we get a Windows developer. If we ever get one, that is...
