#2 - 08/17/2008 02:50 PM - Sputnick

Uh... can't reproduce it with changing the identity in neither the combobox of the Identities settingspage nor the Networks settingspage... what did you mean with "parameters"? And how are notices related to that? O_o

I am currently doing some changes in the handling of Identity and Network data anyway, so this might fix things automagically in any case.

#3 - 08/18/2008 12:32 AM - Sputnick

Closing this as fixed, since I assume the recent changes should do this. If it's still b0rked in current git, please reopen (and provide a way to reproduce that I can understand ;-))

#4 - 08/19/2008 08:05 PM - ZRegis

Not fixed on last night build.

Step improvement:
Go to networks ==> click on the left menu to the network item.

#5 - 10/19/2008 10:32 PM - Sputnick

Still can't reproduce this, I tried several things (changing identities, editing network settings...). Either I still misunderstand the steps to reproduce, or it's fixed meanwhile.
