#3 - 11/28/2008 06:38 PM - jakob

The two provided patches provide the means to have sender auto coloring ready for usage, as well as being able to enable and disable it in the colors configuration.

The used colors are based on the tange colorscheme and style guidelines which can be found at:
http://tango.freedesktop.org/Tango_Icon_Theme_Guidelines

#4 - 11/28/2008 07:17 PM - jussi01

Testing this now, seems to work well on first 5 mins of use.

#5 - 01/13/2009 10:14 PM - dalbers

Been using this patch for quite some time now and it works really nice.

One tiny suggestion to consider for ingestion to mainline Quassel:Let coloring in the Chatmon be based on the network and channel information instead of the nickname.

#6 - 01/14/2009 12:46 AM - dalbers

- File 0001--Implemented-Sender-auto-coloring-based-on-the-tan.patch added

- File 0002--Implemented-Settings-option-to-enable-disable-sen.patch added

#7 - 01/14/2009 01:15 PM - dalbers

- File 0003-_sender-became-private-use-sender-instead.patch added

#8 - 01/29/2009 12:34 PM - dalbers

- File 0004-Use-Oxygen-palette-as-hardwired-sender-colors-for-no.patch added

#9 - 02/11/2009 04:16 PM - Sputnick

- Status changed from New to Assigned

- Assignee set to Sputnick

- Priority changed from High to Normal

- Target version set to 0.4.0

- OS set to Any

#10 - 02/15/2009 07:17 PM - Sputnick

- Status changed from Assigned to Resolved

- % Done changed from 0 to 100

OK, finally applied the patches. Thanks to jakob for the initial work, and to Daniel for improving and continuously rebasing them ;-)

Note that the setting for enabling this is hidden away in Settings -> Color Settings -> ChatView -> Message -> Sender auto coloring.
