Description

When I select a text in the chatwidget, I cant paste it via the middle mousebutton into a terminal/browser/whereevere.

Solution is simple: use XConvertSelection and friends to put the selection into the X clipboard (or use some QT function which does this).

Works fine here, and code states that the selection is transferred to both the clipboard and the X11 selection as well, so this is most likely a local problem... otherwise, please reopen.
