

Quassel IRC - Bug #322

"quasselcore -h|--help" tries to start quasselcore instead of just displaying the help message

09/21/2008 11:37 PM - billie

Status:	Resolved	Start date:	
Priority:	High	Due date:	
Assignee:	Sputnick	% Done:	0%
Category:	Quassel Core	Estimated time:	0.00 hour
Target version:	0.3.1	OS:	Any
Version:	0.13.1		
Description			
The following is displayed after the help message.			
quasselcore --help			
2008-09-21 23:22:53 Info: Storage Backend is ready. Quassel Schema Version: 11			
2008-09-21 23:22:53 Error: Could not open GUI client port 4242: The bound address is already in use			
Just out of curiosity I tried to use a port which is not already used and I got the following.			
quasselcore --port=3000 --help			
2008-09-21 23:30:51 Info: Storage Backend is ready. Quassel Schema Version: 11			
2008-09-21 23:30:51 Info: Listening for GUI clients on IPv6 port 3000 using protocol version 5			
The strange thing is I can not find an additional process of quasselcore running at port 3000. So it is not really starting or dies immediately after issuing the command.
