I wanted to paste the crash log directly here, but stupid mantis chops the log after 3 lines for whatever reason... o_O

Anyways: this has nothing to do with the web preview.

I suspect a style issue triggered the crash...

#2 - 12/03/2008 12:00 PM - Sputnick

Most likely an upstream (Qt) issue. We suspect that it will be fixed in Qt 4.4.4, according to this:

If this crash happens again with Qt >= 4.4.4, please reopen.
