

Quassel IRC - Bug #365

Replace QString("...").arg(param1).arg(param2) with QString("...").arg(param1,param2) everywhere

10/24/2008 10:31 AM - Sputnik

Status:	Resolved	Start date:	
Priority:	Immediate	Due date:

Target version:	0.3.1	OS:	Any
Version:	0.13.1		
Description			
[10:26:13] <coekie> it might be a good idea to replace QString("...").arg(param1).arg(param2) with QString("...").arg(param1,param2) everywhere [10:26:33] <coekie> I haven't found anything concrete really dangerous with that, but it's a real recipe for trouble [10:26:37] <Sput> why is that? [10:27:18] <coekie> worst I see is that trying to ban "sel" on channel "#quas%2", will actually set the mode on #quassel [10:27:48] <coekie> the code says: QString("MODE %1 +b %2").arg(banChannel).arg(banUser); [10:27:53] <Sput> but arg(QString, QString) is just a convenience wrapper for arg(QString).arg(QString) [10:27:59] <Sput> isn't it? [10:28:11] <coekie> no, the api docs even say why :) [10:28:28] <coekie> "this is the same as str.arg(a1).arg(a2), except that the strings a1 and a2 are replaced in one pass. This can make a difference if a1 contains e.g. %1" [10:28:35] <Sput> oh [10:28:57] Sput trackers [10:29:17] <coekie> and String("MODE %1 +b %2").arg("#quas%2") -> QString("MODE #quas%2 +b %2").arg("sel") -> QString("MODE #quassel +b sel") [10:30:03] <coekie> as I said, nothing dangerous right now, but if you do it everywhere, you might end up doing it somewhere where it *is dangerous :) [10:45:09] <coekie> uhm, trying to part #test%2 makes my client go aware [10:47:37] <coekie> awire = client keeps printing "Invalid format code in string: coekieq (coekie@78-21-88-232.access.telenet.be) has left #coekietest%http://quassel-irc.org - ..." and doesn't respond anymore
