Description

Hi ppl,

after i start quassel my first action is, to click every channel to mark it as read. otherwise i cant see in wich channel a ppl is writing something becaus in every channel comes a welcome message or the topic. this sucks a little bit. it would be great to have a shortcut to mark all channels as read.

maybee im not the only one who miss this feature :)

btw my first post here and i want to say: thanks for the great client ...
