

Quassel IRC - Bug #431

Quassel core dies occasionally on client connect

12/03/2008 10:55 AM - tobyS

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Quassel Core	Estimated time:	0.00 hour
Target version:		OS:	Any
Version:	0.4.0		
Description			
Sometimes, when I re-connect to the core with my client, the core simply dies. Find the debug log attached.			
Additional information:			
2008-12-03 10:51:40 Info: Client connected from 80.140.104.73			
2008-12-03 10:51:41 Debug: Starting TLS for Client: 80.140.104.73			
2008-12-03 10:51:41 Debug: Using compression for Client: 80.140.104.73			
2008-12-03 10:51:41 Info: Client 80.140.104.73 initialized and authenticated successfully as "tobyS" (UserId: 1).			
2008-12-03 10:51:41 Debug: Quassel IRC: "0.3.1" "2f6178fc5770ea25c48bca16610cd677e3092818"

```

History

#1 - 12/03/2008 10:56 AM - tobyS

I missed to set the affected version: Client and core run 0.3.1.

#2 - 12/28/2008 01:51 AM - Sputnik

- Priority changed from High to Normal

#3 - 02/21/2009 10:38 AM - tobyS

- File quassel.log added

- File Quassel-Crash-20090221-1031.log added

The behaviour still occurs in 0.4.0. See attached debug log and generated backtrace.

#4 - 02/19/2014 12:39 AM - Sputnik

- Description updated

- Status changed from New to Closed

Can't imagine this still being valid. Otherwise, please file a new bug report (possibly with debug symbols).
