Quassel IRC - Feature #487

Provide better control about embedding data files as resources or not

01/16/2009 07:02 PM - Sputnick

Status:	Resolved		**Start date:**	01/16/2009
Priority:	Normal		**Due date:**

Category:	General / Unspecified		**Estimated time:**	0.00 hour
Target version:	0.4.0			
OS:	Any			

Description

I keep thinking about a general -DEMBED_DATA flag (or something like that) that will embed all separate files (e.g. for deploying on windows), rather than the confusing fine-grained control we have now. On unixy systems, having separate files is usually the preferred way.

Should probably couple that to -DSTATIC, since static builds should usually embed all data.

History

#1 - 02/11/2009 09:04 PM - Sputnick

- Status changed from Assigned to Resolved

- % Done changed from 0 to 100

- OS set to Any

Fixed in the recent build system pimping.
