# Quassel IRC - Bug #510

## Channel traffic fed into network buffer too

**Description**

With the current Kubuntu package, we default to freednode (called Kubuntu IRC) and #kubuntu.  Traffic for #kubuntu also shows up in the network buffer too.  It looks almost like they are symlinked as if I click on one, they both unhighlight for no pending traffic.  Also it doesn't matter if I move where it is on the list.

I only see this in the mono client, but my buffer list in the split client predates the package provided list.

I'm not sure if this is my patch or some other issue.  Patch attached.

- File Kubuntu_IRC.png added

I was unable to reproduce this.

Applied your patch and tested it with a clean config. Only thing I did after starting the mono client was rightclicking on "Kubuntu IRC" and selected connect.

Attached two screenshots.

Are you sure it's not the chatmonitor? Some screenshots could be helpful

**#3 - 02/02/2009 03:10 PM - kitterma**

- File snapshot2.png added

- File snapshot3.png added

Here's some screenshots ..

**#4 - 02/02/2009 04:18 PM - EgS**

To be honest: I don't see what's wrong with those screenshots (despite the fact that snapshot2.png and snapshot3.png look the very same).

I don't think you mean the "[ChanServ] Welcome to #Kubuntu!..." message, do you?

**#5 - 02/02/2009 11:42 PM - kitterma**

The issue is that the same content is in the "Kubuntu IRC" and #kubuntu buffers.  Maybe it's some setting corruption issue.  Let me delete the local data and try again.
