Target version:				
Version:	0.3.1+		**OS:**	Any

Description
ich i hover an link like this one http://www.notmart.org/misc/tokamak2/plasma-mid.ogv in quassel, the cpu load gets really high and quassel is freezing. some other users confirmed the bug. somebody told me this is an webkit bug

History

#1 - 02/03/2009 10:42 PM - neversfelde

I can confirm on latest jaunty (0.4.0~git090202).

#2 - 02/04/2009 11:40 PM - EgS

- Status changed from New to Rejected

This is not a quassel issue.

```
$ w3m -dump_head http://www.notmart.org/misc/tokamak2/plasma-mid.ogv
HTTP/1.1 200 OK
Date: Wed, 04 Feb 2009 20:24:11 GMT
Server: Apache/2.2
Last-Modified: Tue, 03 Feb 2009 19:37:56 GMT
ETag: "49b01b8-2b1769-46208ced26d00"
Accept-Ranges: bytes
Content-Length: 2824041
Connection: close
Content-Type: text/plain
```

As you can see the Server delivers the File with a totally messed up Content (text/plain). Combined with about 2MB of data QWebKit tries to render quite some big "text file" which results in a high load.

So there are 2 issues of which none quassel is responsible for:
a) the wrong content type delivered by the webserver
b) slow rendering of large text chunks by QWebKit

-> rejected
