Description I have completely translated Quassel 0.4.0 into Slovenian, but when testing the translation I have noticed that some parts of Quassel are not shown translated: • toolbar (button text and submenus) • context menu for buffers in buffer list (except the last item) and submenus • context menu for nicknames (except for the first item) and submenus • the last two items in main chat view context menu and all submenus There is also a string "Main Toolbar" (for example in View → Toolbars) that can't be translated

All others translations are available and translated.

Possibly a thingamajig missing in the translation use process?
