

Quassel IRC - Feature #589

Update unread message marker after new messages arrive and not after channel switch

03/01/2009 08:17 PM - billie

<b>Status:</b>	New	<b>Start date:</b>	03/01/2009
<b>Priority:</b>	Normal	<b>Due date:</b>

<b>Target version:</b>			
<b>OS:</b>	Linux		
<b>Description</b>			
Currently when you switch to a channel where you have unread messages you get the unread messages marked by a line that disappears after you switch to another channel and back. What about leaving the marker a the current position and only update it when there are new messages instead of directly setting it to the end after a channel switch. So when you switch to a channel where you want to read messages and accidentally switch to another channel you don't loose the marker and you still know where to read on.
