

Quassel IRC - Bug #643

Quassel Client chrashes when testing a notification sound

03/28/2009 11:20 PM - Cybertinus

Status:	Closed	Start date:	03/28/2009
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Quassel Client	Estimated time:	0.00 hour
Target version:		OS:	Any
Version:	0.3.0.x		
Description How to reproduce: 1. Open the settings of Quassel client (press F7 for example) 2. Go to the "Appearance -> Notifications" settings 3. Select a Notification (the "highlight" notification is a good choice) 4. Check the box labeled "Play a sound" 5. Select a sound in the box, next to the checkbox 6. Press the play button. Actual result: A full chrash of Quassel Client Expected result: The selected sound should be played. Used software: Quassel Client 0.4.1 =kde-base/phonon-kde-4.2.1 (this is Gentoo notation ;)) =media-sound/phonon-4.3.1 (this is Gentoo notation ;)) Test system: Gentoo ~amd64 Quassel 0.4.1 with the following USE-flags: X dbus kde oxygen server ssl webkit -debug -linguas_cs -linguas_da -linguas_de -linguas_fr -linguas_hu -linguas_nb_NO -linguas_ru -linguas_sl -linguas_tr -monolithic -phonon)			

History

#1 - 03/28/2009 11:27 PM - billie

Reproduced here with qt-phonon.

#2 - 03/02/2010 01:14 AM - johu

- Status changed from New to Closed

- Version changed from 0.4.0+ to 0.3.0.x

can not reproduce on kde 4.4.0, should be fixed
