

Quassel IRC - Feature #750

SSH (tunnel) support

07/25/2009 01:15 PM - bear.sh

Status:	New	Start date:	07/25/2009
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Quassel Client	Estimated time:	0.00 hour
Target version:			
OS:	Any		
Description I run the core on a system behind NAT. Therefor I think it would be quite comfortable to use a SSH tunnel to connect to the core. Needed components: - Field to enter username - Field to enter server address - Local and remote port to bind - Certifical (if used) - Password similar to something like this: ssh -L LOCALPORT:localhost:COREPORT SERVER_IP			

History

I do not think this should actually be implemented into quassel. This feature would much better fit into the scheme of a script, because this feature is rarely used, but is needed. With a script a User who needs this feature just loads the script and everyone is happy.
