| **OS:** | Any | | | |

| Description |
|---|
| We need to have ways to change the core configuration, rename/remove/manage core users and so on. We'll need to think about using ACLs for this. |

## History

**#1 - 02/24/2008 01:24 AM - phon**

i will start to make a frontend for managing users - if that's ok with everybody...

**#2 - 03/14/2008 01:08 PM - EgS**

yes it is :)

**#3 - 12/28/2008 01:50 AM - Sputnick**

*- Priority changed from High to Normal*

**#4 - 03/02/2010 01:00 AM - johu**

*- Tracker changed from Bug to Feature*

*- OS set to Any*

**#5 - 08/11/2010 10:34 PM - public**

Would be nice if you could make it possible to move users from one core to another. The Problem is to find all user specifeid things in the database and then change some keys so that they are still unique (e.g. sender, could be the same name on both cores. so you have to use only one entry...)
