Quassel IRC - Bug #786

Window not resizable on Mac OS X

08/28/2009 03:09 PM - fuzzy76

Status:	Resolved		**Start date:**	08/28/2009
Priority:	Urgent		**Due date:**	
Assignee:			**% Done:**	0%
Category:	Quassel Client		**Estimated time:**	0.00 hour
Target version:	0.5.0			
Version:	0.3.0.x		**OS:**	Mac OS X

Description

As shown on http://skitch.com/fuzzy76/b7b4s/quassel-irc-quassel the main window starts in a way too small state on OS X and is not resizable.

The client I used was this: http://quassel-irc.org/pub/QuasselClient_MacOSX-universal_0.5-rc1.dmg

Maximizing worked. Later I also discovered that adding the statusbar to the window would also let me resize it.

This seems fixed in the final build (though, I'm not sure how to repro).

#2 - 02/18/2010 01:19 AM - johu

- Status changed from New to Resolved

- Version changed from 0.5-pre to 0.3.0.x
