

Quassel IRC - Bug #822

changing hidden events on multiple channels loses information

10/08/2009 10:48 PM - honk

Status:	New	Start date:	10/08/2009

Version:	0.5-pre		
Description			
when changing events with multiple channels marked, all channels have the same events hidden afterwards regardless of what they had hidden before.			
steps to reproduce:			
1) mark two or more channels, at least two of which with different events hidden:			
i.e. mark one channel with mode changes hidden and one with mode changes visible			
2) with the channels marked toggle a second event type (i.e. day changes)			
expected result:			
events other than the one toggled remain unchanged (i.e. still one channel with mode changes hidden and one visible)			
actual result:			
all marked channels have the same events hidden after toggling any of the event types.
