

Quassel IRC - Feature #85

Implement a "Simple Mode" for the monolithic client

01/22/2008 03:13 PM - Sputnik

Status:	Resolved	Start date:

Category:	Quassel Client	Estimated time:	0.00 hour
Target version:	0.3.1		
OS:	Any		
Description In order to provide an easy experience for new users, or for people who want to use Quassel like a traditional client (i.e. without core/client separation), we should provide an easy mode that automatically sets up the sqlite database and creates a core user with a scrambled (or no?) password, disabling listening to the outside of course. This Simple Mode could be a choice in the First-Run Wizard, and it should be possible to "upgrade" to Advanced Mode later by providing the necessary settings.			

History

This will be made dependent on Qt 4.4, since we should probably make use of QLocalSocket for the internal connection...

#2 - 10/22/2008 12:01 AM - EgS

Actually this does not depend on Qt 4.4. but we depend on Qt 4.4 now anyways.

A simple monolithic mode is implemented in current git.

Some of it's features:

- no need to setup the core
- no need to setup a account in the client - just click "use internal core" and you're done
- Quassel's SignalProxy can now be connected directly thus directly delivering calls - no need for a local socket or something similar
