Version:	0.5.0	OS:	Linux
Description hello, I run kubuntu karmic 9.10 on x86 64 , Linux moon 2.6.31-15-generic #50-Ubuntu SMP Tue Nov 10 14:53:52 UTC 2009 x86_64 GNU/Linux Quassel have crashed and send a repport : Version: v0.5.0 (dist-638987e)			

History

#1 - 03/03/2010 07:28 PM - johu

- Status changed from New to Feedback

- Target version changed from 0.5.0 to 0.6.0

please give feedback whether this problem exists in >=0.5.2

#2 - 03/03/2010 10:10 PM - starslights

Hello johu,

I will do with pleasure but i i must ask why it is no source list to can update Quassel, the problem are that i can test it in VM while i use it as my client irc.

So i mean that i can't build it from source to only test. So i think that will be great to can do that with your personnel source list and so direct update existing version without waiting that kubuntu do...

Best Regards

#3 - 03/03/2010 10:19 PM - johu

see http://bugs.quassel-irc.org/projects/quassel-irc/wiki/Build_Quassel_on_Linux_%28english%29

#4 - 03/03/2010 11:39 PM - starslights

Thanks for your answer but it was not my question, i know how build and work with git , svn etc, i mean that i use irc on my stable pc, not as test and so it's installed by default on kubuntu karmic 9.10

It will not bad to have a "source lists " , not only a code source , so it will possible to upgrade my existent version from repo directly .

Well i think that i will uninstall my default Quassel and build from source.....

Hello,

Thanks very much, i apologize my friend ,so you have backported and i have 0.5.2 from sometimes now, so The day where it was backported, it was updated on my system.

I must say that i have this crash again since 0.5.2.

So my feedback are "bug solved".

Best Regards

Stars
